FUNDAMENTALS FOR CONTENT CREATORS

While creating your own online content can be a fun and creative way to express yourself, it is important to remember to **protect the subject matter** of all videos, blog posts, photos, etc., as well as **yourself,** by openly communicating with your parents about what content you are creating, and making sure to keep it clean. Here are some specific things to keep in mind:

1. DO NOT
post anything **illegal** or **dangerous.**

2. NEVER
post revealing details such as your home address, school or the club where you play sports.

3. ALWAYS
respect other people's privacy. Even if you capture someone doing something potentially embarrassing, always check with that person before posting.

4. REMEMBER
that once a video, photo, etc. is posted, **it is out of your control,** even if it is posted privately to your friends, or if you later delete it (nothing is ever really permanently deleted from the Internet).

5. DON'T
imitate or re-enact the **latest social media challenges** without asking your **parents** for permission.

6. ANY MUSIC
you use in the background of a video should be an **original creation.**

7. DON'T
curse or **use foul words** in your content.

If you have followed the above suggestions, then remember to also be creative, original and have fun. Using your online content to **help others** is always a good idea.
