

Name: _____

Grade: _____

Date: _____

Do you do this?

Action	No I do not do this.	Yes I do this.
1. I use the same password for all the sites I visit. It is easier to remember it this way.		
2. My password is a mix of letters, numbers, and symbols.		
3. I share my password only with my very closest, best friends.		
4. When I get a reminder prompt to update the operating system on my computer (or my family computer) I do it or I encourage my parents to do it.		
5. Sometimes when I am on Facebook, I see a company offering to give away a free gift in exchange for my information. It would be great to win the free gift, so I give my personal information.		
6. I like getting offers to register on web sites. I give my personal information out because I do not want to miss hearing about anything.		
7. Sometimes on Facebook I see a link to a new celebrity video. When I click to watch it, it asks me to take a survey first. I take the survey because I really want to see the celebrity video.		
8. If I got a message on my Facebook wall that asked "Is this you in this photo?" I would definitely click on it to check my photo out.		
9. My mobile phone is password protected.		
10. I go online and search for free movies or free games and then download from the first site that comes up in my search results.
