**STUDENT'S WORKSHOP NOTES**  
IDENTITY THEFT

# Workshop Notes

This notes summarizes the most important information highlighted in the workshop you attended. The points below serve as a reminder to help you stay aware and informed about Identity Theft. Don't forget to share this information with your family and friends to help them keep their online identity safe. ☺

**Identity Theft** occurs when someone steals your personal information and uses it to pretend to be you without your knowledge.

**Identity Fraud** happens when the person who has stolen your information uses it to scam people.

Identity Theft has become the fastest growing crime compared to other crimes in the world.

Any one holding an identity in the digital world is a target, and similarly, identity thieves can also be anyone.

It is our sole responsibility to secure our personal information, both online and in real life.

Your Personal Information includes: Full Name, Email address, Date of birth, Place of birth, Residential address, Telephone number, and Qatari ID number.

There are several types of Identity Theft such as creating user names in another person's name, applying for a loan or credit cards fraudulently in another person's name, as well as creating a fake identity on the Internet.

You risk getting your identity stolen if you: have weak passwords, left out wallets or purse, lost cards, left documents in a trash, or responded to any of the phishing emails and websites.

To secure your identity you have to take care of your bank accounts, check your credit report more frequently, and protect your personal information and belongings.

Try to get yourself aware of the common scenarios and tactics currently used by identify thieves so you can avoid falling prey to their schemes.
