

TIPS ON HOW TO SAFELY USE YOUR CREDIT CARD ONLINE

Passwords

Use strong passwords and change them frequently to keep yourself safe (at least every six months).

Updates

Keep your personal information linked to your credit card (e.g. phone number, email) up to date.

Statements

Check alerts and your bank statement thoroughly so that you don't miss any fraudulent transactions.

Site Security

Ensure that the website link you're using is secure.

Payment Method

Pay with a credit card rather than a debit card, as it won't directly take money from your own account.

Web Address

Check the accuracy of the wording of the website address.

Internet Connection

Don't shop online when connected to a public Wi-Fi.

Reporting

Contact your bank immediately in case of loss or theft of your credit card.

Monitoring

Keep tracking your online orders and transaction to refer to in case of any fraud or items not received.

Notification

Activate the option of receiving SMS alerts on your registered mobile number to notify you about each transaction made.

Remind me Later

Don't save your credit card details on the browser that you always use.

Did You Know

3-D Secure online card payments protect customers by asking them to complete an extra verification step with the bank. Each time you use your credit or debit card online, a new window will pop-up asking you to enter a one-time password. One-time password will be sent to you in an SMS on your registered mobile number and it will be valid for only one transaction.
